Ms. Maria Kakutani
Office of Local Assistance
California Integrated Waste Management Board
Cal EPA Building
1001 "I" Street
P.O. Box 4025
Sacramento, CA 95812-4025

Dear Ms. Kakutani:

Subject: Orange County Five Year Countywide Integrated Waste Management Plan (CIWMP) Review

On behalf of the County of Orange and its 34 cities, please find attached a copy of the Five Year CIWMP Review Report (Report). In conformance with Section 41822 of the Public Resources Code (PRC), the County has reviewed the CIWMP.

The CIWMP was approved by the CIWMB in March 1996. Thus, the anniversary date for the first five-year CIWMP review was March 2001. At that time the County's limited staff resources were focused on program implementation. As a result, there were not sufficient staff resources to undergo a five-year review until this time. A request for an extension was granted by the CIWMB. Orange County's CIWMP Review Report is due May 31, 2003.

The County's Waste Management Commission/AB939 Local Task Force (LTF) appointed an ad hoc committee to review the Report within the time frame specified in Section 18788 of Title 14 of the California Code of Regulations (CCR). The ad hoc committee submitted written comments to the County and they have been incorporated into the Report.

The County finds that a CIWMP revision is not necessary at this time. Guided by the current CIWMP, the County and its 34 cities will continue to implement programs and strive to fulfill the goals of the Integrated Waste Management Act.

Please contact Sue Gordon, Manager of Environmental Programs, at (714) 834-4118 should you have any questions.

Respectfully Submitted,

A handwritten signature in cursive script, reading "Janice V. Goss".

- Within 90 days of receipt of the CIWMP Review Report, the CIWMB shall review the County's findings and, at a public hearing, approve or disapprove the County's findings.

CCR Section 18788 also identifies the minimum issues, which are to be addressed in the CIWMP Review Report. They are:

- (A) Changes in demographics in the county;
- (B) Changes in quantities of the waste within the county;
- (C) Changes in funding sources for administration of the countywide siting element and summary plan;
- (D) Changes in administrative responsibilities;
- (E) Program implementation status;
- (F) Changes in permitted disposal capacity and quantities of waste disposed of in the County;
- (G) Changes in available markets for recyclable materials; and
- (H) Changes in the implementation schedule.

The County of Orange Integrated Waste Management Department requested and was granted several extensions to file the CIWMP Five-Year Review due to finite staff resources and the existence of several priority regulatory projects. Throughout the process the County has been in close contact with CIWMB staff, seeking their guidance and working to determine project priority and submittal schedules.

In completing the review, CIWMB legal staff determined that jurisdictions can utilize their annual reports to update program information, if a revision is not determined to be necessary. If a revision is determined to be necessary, it may be submitted with the next annual report. County staff has relied on the annual reports, the comprehensive information contained on the Board's website, and the strong working relationship with local jurisdictions to complete the Five-Year CIWMP Review.

CHAPTER 2.0 BACKGROUND

Orange County is made up of the county unincorporated area and 34 cities that cover 320 square miles with a population of nearly three million people. The following jurisdictions are within Orange County.

Aliso Viejo	La Habra	Placentia
Anaheim	La Palma	Rancho Santa Margarita
Brea	Laguna Beach	San Clemente
Buena Park	Laguna Hills	San Juan Capistrano
Costa Mesa	Laguna Niguel	Santa Ana
Cypress	Laguna Woods	Seal Beach
Dana Point	Lake Forest	Stanton
Fountain Valley	Los Alamitos	Tustin
Fullerton	Mission Viejo	Villa Park
Garden Grove	Newport Beach	Westminster
Huntington Beach	Orange	Yorba Linda
Irvine	Orange County- Unincorporated	

The County of Orange developed its CIWMP in 1996 containing the following documents for its jurisdictions.

- Source Reduction and Recycling Element (SRRE) for each city and county named above.
- Household Hazardous Waste Element (HHWE) for each city and county named above.
- Non-disposal Facility Element (NDFE) for each city and county named above.
- Countywide Siting Element (CSE).
- Summary Plan (SP).

The CSE, SP and CIWMP were approved by the CIWMB in March 1996. Thus, the anniversary date for the first five-year CIWMP review is March 2001. At that time the County's limited staff resources were focused on program implementation. As a result there were not sufficient staff resources to undergo a five-year review until this time. A petition for an extension was filed and granted. Orange County's CIWMP Review Report is due May 31, 2003.

The purpose of the CIWMP Five-Year Review Report is to:

- (1) Document the compliance of PRC Section 41822 and CCR Section 18788 by Orange County and Orange County cities.
- (2) Conduct a broad review, and solicit recommendations and support for the course of action identified by the Orange County LTF to achieve increased levels of waste diversion.

The Orange County Waste Management Commission/Local Task Force (WMC/LTF) meets regularly to discuss, consider and make recommendations regarding solid waste issues for Orange County. One of the issues in its purview is AB 939 program implementation and compliance and, as such, it is responsible to review the content and adequacy of each of the planning documents, make observations on the current applicability of the CIWMP, and put forward any necessary recommendations.

Table 1
Diversion Rate Trends (1995-2000)*

Source: CIWMB

* Note: 1990 diversion rates are not on the board's web site because the jurisdiction's biennial reviews did not start until 1995.

N/A = City not incorporated yet.

PDUSR = Preliminary Data Under Staff Review

BAGFE = Board Approved Good Faith Effort

BAADR = Board Approved Alternative Diversion Requirement

No Rate = Board Accepted. Based on current data a diversion rate could not be accurately determined due to inaccurate base year data, a Board approved base year that is later than the report year or other issues.

PD = Biennial Review Not Completed Yet; Preliminary Data

BA = Board Approved

BATE = Board Approved Time Extension

As demonstrated by Table 1, more than half of the jurisdictions are meeting the goal of achieving a fifty percent diversion rate. Of the remaining jurisdictions, the majority is within fifteen percent of the diversion goal and actively adjusting their programs to close the gap. Only two jurisdictions are under thirty percent diversion. Both jurisdictions, Laguna Hills and the County Unincorporated, have secured Alternative Diversion Requirements to account for the nature of their jurisdiction's situation. All thirty-five jurisdictions have worked closely with the State to meet the intent of the law.

(A) DEMOGRAPHICS

Tables 2 through 7 depict demographic trends from 1990 to 2000. Overall, Orange County and its cities have experienced significant growth, which has resulted in increased waste generation. Significant events in this time period include the incorporation of several cities, the annexation of numerous communities and development of much of the southern portion of the county. These governing changes have reduced the County unincorporated demographics and shifted them to the cities proper. None of the changes, however, alter the applicability of the planning documents or warrant a revision to the CIWMP.

Table 3

Table 4
Countywide Employment

1990	2000	% Change
1,282,100	1,473,800	15%

Source: CIWMB

The County has experienced an 18 percent growth in population between 1990 and 2000 countywide. The population growth has been significant in some cities while minimal to a notable decrease in others. The majority of the decreases, however, are population shifts where jurisdictions have annexed or incorporated areas that formerly were part of the unincorporated territory. The population growth has caused similar increases in housing units throughout the County with the similar uneven distributions.

Taxable sales growth throughout the County varies from city to city. Taxable sales figures are the total taxable transactions (reported in thousands of dollars) for sales subject to sales and use taxes. Excluded are sales for resale, sales of nontaxable items such as food for home consumption and prescription medicines, and taxable sales disclosed in audits by the State Board of Equalization.

Countywide employment has increased 15 percent between 1990 and 2000. Employment numbers are indicators of employment trends and are not absolute counts of individuals. The numbers are derived from a sample survey designed to track the growth or decline in the labor force by tracking the number of workers.

The County feels that these changing demographics do not prevent its jurisdictions from ultimately meeting the goals of AB939. Jurisdictions that have had large increases in specific demographics have responded with programs, technical assistance, and waste generation studies. Also, the changing demographic profile for the County is accounted for through the adjustment methodology utilized to calculate the individual jurisdiction diversion rates.

An analysis of housing in Orange County shows a notable increase in both single family and multi-family residences. Overall, housing increased by 13.7 percent, with single family housing showing the strongest growth at 14.9 percent increase and multi-family housing sustaining a steady increase of 11.5 percent. See the following tables for more detailed data.

Source: California State Department of Finance – Demographic Research Unit

Although significant increases can be seen in these demographic indicators, the programs and facilities in Orange County appear to have sufficient elasticity to handle the increasing inputs. The large increase in dwellings, particularly within the Cities of Irvine, Laguna Niguel, Mission Viejo, San Juan Capistrano and Tustin have not lead to a dramatic impact on diversion rates. Rather, the planned and implemented programs have met the needs of the cities and continue to work towards achieving the diversion goal.

(B) QUANTITIES OF WASTE

Table 8 provides the calculated per capita (pounds per person per day - ppd) of residential and total waste generation within each jurisdiction.

Source: CIWMB, Accepted Diversion Rate Data - Center of Demographic Research, Orange County Progress Report 2001

The reported disposal tonnage, according to the CIWMB Disposal Reporting System (DRS), is compiled in Table 9 for each jurisdiction for the period 1995 through 2000. The tonnages have increased and reflect the significant growth, which has occurred in the County from population growth, housing construction, and the expansion of the commercial sector.

Table 9

Solid waste disposal and waste generation quantities were projected for the fifteen-year period (1990-2005) in the SRRE's. The SRRE projections for disposal quantities

in the year 2000 were compared with the reported disposal tonnage (DRS) from the CIWMB website for 2000. The comparative results are presented in Table 10.

Table 10
Comparison of SRRE 2000 Projected Disposal Tonnage vs.
2000 Reported Disposal Tonnage*

Jurisdiction	SRRE Projected	DRS Reported	% Difference

Source: CIWMB and reported from each jurisdiction's SRRE's

The reported disposal amounts are fairly close to the SRRE projected disposal amounts for the cities of Laguna Beach, Laguna Hills, Lake Forest, Placentia, San Juan Capistrano and Villa Park. The other jurisdictions, however, vary by amounts ranging from a 139% increase to a 72% decrease in disposal. The wide range, however, is misleading in some cases as there are mitigating factors that explain the variations. For example, the 72% decrease in the County Unincorporated disposal rate can be explained by the shift of population caused by incorporations and annexations of County territory. Similarly, the 139% increase in Brea's projected vs. actual disposal may be attributed to unauthorized allocation of disposal tonnages. However, even excluding the most extreme differences, the remaining range of variations is wide.

Table 11 compares the year 2000 waste generation quantities projected in the SRRE, with the waste generation amounts estimated by the adjustment methodology, despite the differences from the planning documents, the jurisdictions are moving steadily toward full compliance with AB939. Even though the data shows increases in most jurisdictions, the diversion programs put in place have addressed the planned generation amounts as well as the actual generation numbers.

The one notable decrease in generation estimates vs projections is found in the County Unincorporated area where the population shift due to annexations/incorporations explains the significant decrease. In summary, however, the generation data serves as another indicator of the adequacy of the CIWMP planning documents and a testament to the flexible way in which their programs adapt for unanticipated generation and disposal trends.

Table 11
SRRE 2000 Projected Waste Generation Tonnage vs.
2000 Estimated Waste Generation Tonnage (Adjustment Methodology)*

(C) FUNDING SOURCES

No significant changes have occurred in the basic funding sources for the administration of the Integrated Waste Management Department. The primary source of funding is the Integrated Waste Management Department Enterprise Fund, which derives monies from the gate fees at the North Regional Landfill, Central Regional Landfill and South Regional Landfill. The Enterprise Fund pays for landfill operations, closure, and capital improvements; household hazardous waste collection; program administration; regulatory compliance; and AB 939 programs. Locally based programs for the cities (e.g., public education, municipal staffing and other local activities) are funded from local refuse rates for collection service, grant funds and other local sources.

(D) ADMINISTRATIVE RESPONSIBILITIES

Although there has been some reorganization of responsible personnel, no significant changes have occurred in the administration of the CIWMP. Within the County of Orange, the Integrated Waste Management Department has continued as the overall responsible countywide planning agency. IWMD also administers some regional programs, such as the four Household Hazardous Waste Collection Centers. Each jurisdiction is responsible for its own local programs.

The cities within the County of Orange have appointed Recycling Coordinators. Many of the Recycling Coordinators attend the sub-regional meetings hosted by the County of Orange every other month to facilitate the sharing of information and the inter-jurisdictional support of city programs. The County of Orange and the cities within the County have advised the CIWMB annually of the primary contacts for AB 939 through their Annual Reports.

(E) PROGRAM IMPLEMENTATION

The annual reports have provided updated information covering program implementation that is current for all 35 jurisdictions. Nearly all selected programs have been implemented. The programs not implemented in their scheduled year have had either a delayed implementation, or have been supplemented with an alternate diversion strategy. The significant changes that have occurred regarding the implementation of diversion programs, involve "program expansion".

The County of Orange and its cities continue to build upon prior years' experience and the increasing support of the general public to increase diversion quantities. The primary diversion programs have been developed through the authorized waste service providers with the help of the County.

Notable changes from the CIWMP include:

- No development of a materials recovery facility in South County
- Delayed implementation of composting programs in early years with programs coming on-line in 2000
- Household hazardous waste handled on a regional basis via the County permanent collection centers rather than local collection events.

(F) PERMITTED DISPOSAL CAPACITY

The County continues to have in excess of 15 years disposal capacity available. Available permitted landfill capacity as reported in the Landfill Capacity Data Sheet of June 30th, 2003 is ~~447~~ 127 million cubic yards (MCY) at the Frank R Bowerman Landfill, 123 MCY at the Olinda Alpha Landfill, 108 MCY at the Prima Deshecha Landfill and 26 MCY at the Santiago Canyon Landfill.

Landfill Capacity Data
As of June 30, ~~2004~~ 2003

LANDFILL NAME	SOLID WASTE FACILITIES PERMIT (SWFP Issue Date)	PERMITTED TONNAGE (TPD)		PERMITTED AIRSPACE (MCY)
		Daily Maximum	Daily Average	
Frank R. Bowerman	1996	8,500	7,390	447 <u>127</u> .0
Olinda Alpha	1996	8,000	7,000	123.1
Prima Deshecha	2000	4,000	4,000	108.0
Santiago Canyon	1994	4,900	4,900	26.0
TOTALS		25,400	23,163	374.1

The County Siting Element (CSE) is kept current through the County's annual report and continues to be an applicable tool. The goals and policies identified in the CSE are listed as:

- Comply with regulations/standards to minimize environmental impacts.
- Eliminate knowing disposal of HHW at landfills.
- Ensure long-term disposal capacity.
- Maximize cost-effectiveness and convenience.
- Promote community awareness.

- Consider regional approaches that are mutually convenient/beneficial.
- Prevent solid waste facilities in incompatible land use areas.
- Protect existing facilities from encroachment of incompatible land uses.
- Maintain an integrated waste management system based on AB 939 hierarchy.

These goals and policies continue to be applicable.

A siting criteria was developed and a siting process was described in the CSE, as required by the regulations. The CSE called for the continued use of County landfills.

(G) AVAILABLE MARKETS

Markets for recovered recyclable materials have been available. Though the market material quantity supply and demand and resulting market prices often fluctuate, outlets continue to be available.

(H) IMPLEMENTATION SCHEDULE

Changes in the implementation schedule have occurred but have not significantly affected the ability of the County and its cities to realize marked progress towards planned diversion levels in the year 2000. The annual reports submitted by the jurisdictions have updated the status of program implementation and the PARIS reports are included as Attachment A.

(I) OTHER ISSUES

Other issues facing Orange County include the following:

- Lack of South County MRF – The lack of a materials recovery facility in South County puts a burden on the region and impacts the system by increasing haul distances, shifting wastesheds and unevenly utilizing disposal facilities.
- Waste Characterization Study/CD Demonstration Project/Commercial Self Haul Study – Each of these issues represent major areas of study for Orange County in the short term. Results of these countywide evaluations will provide the data and increased information needed to guide further program development.
- Disposal Reporting System – Orange County faces significant changes in daily waste hauling and disposal records management in light of the proposed Disposal Reporting System. Though the regulations are in the formative stages, the initial proposals have modeled a system that would significantly impact Orange County, its cities and their waste haulers.
- RELOOC - Although Orange County has adequate landfill capacity, planning efforts are underway to look at long-term disposal needs and alternatives.

RELOOC, an acronym for "Regional Landfill Options for Orange County", is a 40-year strategic plan being prepared by the Integrated Waste Management Department to evaluate options for trash disposal for Orange County citizens. The study phase is completed and a course of action has been selected. The environmental impact study and reporting process is underway.

CHAPTER 4.0

SUMMARY STATEMENT

The overall framework of the CIWMP is still applicable. The goals, objectives, policies, waste management infrastructure, funding sources, and responsible administrative organizational units noted throughout the CIWMP are accurately described. Nearly all of the selected or alternative programs have been and continue to be implemented. Exceptions were noted in Chapter 3.0, Section E or the programs that were not implemented in their scheduled year have had either a delayed implementation, or have been supplemented with an alternate diversion strategy.

Overall, programs are being implemented as described in the annual reports, and the PARIS has been kept updated. The County believes that the most effective use of available resources is to continue using the CIWMP as a planning tool with detailed updates provided augmented by the annual reports. A revision of the Orange County CIWMP is not warranted at this time.
